Glacē Glass Skin Treatment is a comprehensive skin purifying treatment with zero downtime.

Glacē uses a unique combination of treatments to cleanse, smooth, hydrate and clarify to help achieve that glass skin look.

Glacē Treatment Sandwich: Glacē can prepare the skin for other treatments as well as a recovery afterwards to restore hydration, mitigate side effects and downtime.

The Process

1. Skin Preparation: Cleansing foam and gentle multi-active peeling.

2. Glacē Massage: pulsed mode cupping for drainage massage.

3a. Advanced Hydrodermabrasian: Hydrodermabrasion with PHASE A (cleanse, exfoliate, extract).

Other Treatments (Glacē Treatment Sandwich): e.g. Frax, SWT etc.

3b. Advanced Hydrodermabrasian:

Hydrodermabrasion with PHASE B (infuse, restore, nourish).

4. Glacē Massage: calming BioMask Serum with draining-remodelling massage.

5. Glace Finish: Mask and LED treatment (red, blue, green) to brighten skin.

Expected Progress

- An initial sensation of irritation on the skin which will settle a few hours post-treatment.
- Transient redness and tightness is relative common, but is normally short-lived.

If you have any concerns regarding your treatment, please contact your care team.

Immediately After Treatment

- Keep the treated area clean and hydrated. Your therapist will recommend a cleanser and moisturiser.
- Avoid any trauma to the treatment area for 5 days. This includes exfoliants, scrubs, irritants.
- Avoid waxing the area for 7 days.
- Minimise sun exposure and use an SPF50+ sunscreen for 7 days after treatment.

Expected Results

It may take several weeks to a few months for the full effect of the treatment to develop.

A course of 3–6 treatments performed every 4–6 weeks is typical.

Routine maintenance sessions are typically also recommended depending on your baseline skin conditions and goals of treatment.

Potential Adverse Effects

Infrequent adverse effects include the appearance of acne, superficial peeling, tingling, bruising and swelling.

We're dedicated to caring for you
